# **EMAIL PROTECTION SYSTEM SETUP GUIDE**

To protect the electronic sending of Confidential Information, MEMIC uses a passphrase-protected system from Symantec<sup>™</sup> for encrypting and sending First Report of Injury files to our policyholders and their employees. This guide provides instructions to create a passphrase to access the Symantec<sup>™</sup> email protection system and download your files.

#### Notification Email with Unique URL

Once a First Report of Injury has been processed, a notification email will be sent to any and all email addresses provided on the First Report of Injury submission. The sender will show as "**MEMIC Systems**." Please note, email formatting may vary depending on your email system. The email message includes a unique URL which is associated to the email address recipient. Clicking the link will launch your web browser and direct you to the Symantec<sup>™</sup> Email Protection System.

$\pm$	Memic Systems	11:35 AM (2 hours ago)	*	*
	to me 💌			_
	Hello <u>mail@mail.com</u> ,			
	This message is being sent to the email address provided in a recent form submission to MEMIC. In order for Memic Systems < <u>MemicSystems@memic.com</u> > to provide you with a secure, password-protected copy of the document (in PDF format), you will need to create a passphrase. This quick step will allow you access to the PDF. Establishing this password now will also allow you to access these documents in the future.			
	To create your passphrase, click here: <u>https://keys.memic.com/b/f.e?r=%40gmail.com&amp;n=BUjrAp8LrEw3JbCEguGStg</u>	<u>%3D%3D</u>		
	You will be taken to a separate screen where you will create and confirm a passphrase. Once you have created and confirmed a passphrase, your secure PDF document will be sent to you in a separate email.			
	For more information about MEMICs secure PDF email protection process, click here: http://www.memic.com/securepdf			

#### Create a Passphrase

If a passphrase for the associated email has not been set, or it has been three or more months since you last accessed the system, you will be prompted to create a new one. Enter and confirm a passphrase and click the **continue** button.
