## MID-SOLE ICE CLEAT

## WHICH K1 SERIES MID-SOLE ICE CLEAT IS RIGHT?

### COMMON FEATURES

All of Geroline's K1 Series Mid-Sole Ice Cleats have these features in common:

- Industrial Quality built for the job
- One Size fits all - adjusts to fit a variety of styles and sizes of footwear
- The K1 Series Mid-Sole Ice Cleats can be rotated to the top of the boot; no need to remove them when transitioning indoors, climbing or driving
- Durable and Effective ice-penetrating studs
- Hi-Vis Adjustable straps in orange or black (K1 Mid-Sole Original) or red/yellow (K1 Mid-Sole INTRINSIC)
- Compact poly-bag packaging is ideal for on-site vending machines and efficient distribution to the entire team
- The K1 Mid-Sole Ice Cleat reflective patch - your team's safety deserves a market leading, innovative product with a patented and proven design

# THE 8 MODELS OF THE K1 MID-SOLE

Geroline offers **8** variations of the K1 Mid-Sole Ice Cleats for different types of footwear and work applications.

There are **5** models of the K1 Mid-Sole Original and **3** models of the internationally certified, spark proof, K1 Mid-Sole INTRINSIC. In some cases it may be best to supply your team with a variety of different models depending on individual and/or site requirements.

## ORIGINAL 5 MODELS

### K1 SERIES MID-SOLE ORIGINAL

The Original and most popular Mid-Sole Ice Cleat (K1MID). Featuring a Hi-Vis orange strap and durable tungsten carbide studs, the K1MID is most often used with a traditional, defined-heel work boot.

Also available in a black strap version (K1MID-BLK).

**Product Codes: K1MID & K1MID-BLK**

### K1 SERIES MID-SOLE LOW PROFILE

The Low Profile model is designed for footwear with a shallow arch in the sole of the foot, often found in "hiker-style" or tactical boots. The Low Profile model has a narrower rubber platform and shorter studs, providing the necessary traction, fit and comfort.

Also available in a black strap version (K1MID-LP-BLK).

**Product Codes: K1MID-LP & K1MID-LP-BLK**

### K1 SERIES MID-SOLE HIGH PROFILE

The High Profile model is a specialty product designed for safety boots with extra deep treads and an aggressive heel, such as lineman or logger boots used in forestry, power and utilities, oil and gas, the pipeline industry and other deep-freeze environments.

The High Profile model is only available with a Hi-Vis orange strap.

**Product Code: K1MID-HP**

# INTRINSIC 3 MODELS

Geroline offers the **ONLY Internationally Certified Intrinsic Ice Cleats in North America!**

K1 Mid-Sole INTRINSIC Ice Cleats are necessary for oil & gas, refinery, chemical, waste water treatment, and fire rescue applications, among others. When paired with proper ESD footwear, the internationally recognized INTRINSIC certification guarantees against sparks and electrostatic buildup that can lead to explosions in volatile environments.

INTRINSIC models are easily identified by their Hi-Vis red and yellow straps.

There are three INTRINSIC models - Original, Low Profile and High Profile - each offers the same design characteristics as their Original counterparts but are equipped with the important INTRINSIC technology required for instable and volatile environments.

## K1 SERIES MID-SOLE INTRINSIC

Designed for a traditional defined-heel work boot. Equipped with the internationally recognized INTRINSIC certification.

**Product Code: K1MID-INT**

## K1 SERIES MID-SOLE INTRINSIC LOW PROFILE

Designed for a shallow-soled "hiker-style" or tactical boot. Equipped with the internationally recognized INTRINSIC certification.

**Product Code: K1MID-INT-LP**

## K1 SERIES MID-SOLE INTRINSIC HIGH PROFILE

Designed for boots with extra deep treads and an aggressive heel. Equipped with the internationally recognized INTRINSIC certification.

**Product Code: K1MID-INT-HP**

## ACCESSORY - SPACER/SHIM

While the various models of the K1 Series Mid-Soles are designed to fit most of the footwear worn on the job, additional customization is sometimes needed for a perfect fit. Spacers offer additional depth to guarantee that the studs meet the ground to deliver maximum traction.

Spacers are not usually required, but are helpful when the Ice Cleat is "floating" in the arch of the foot and not making proper contact with the ground.

Spacers can be added to any K1 Mid-Sole:

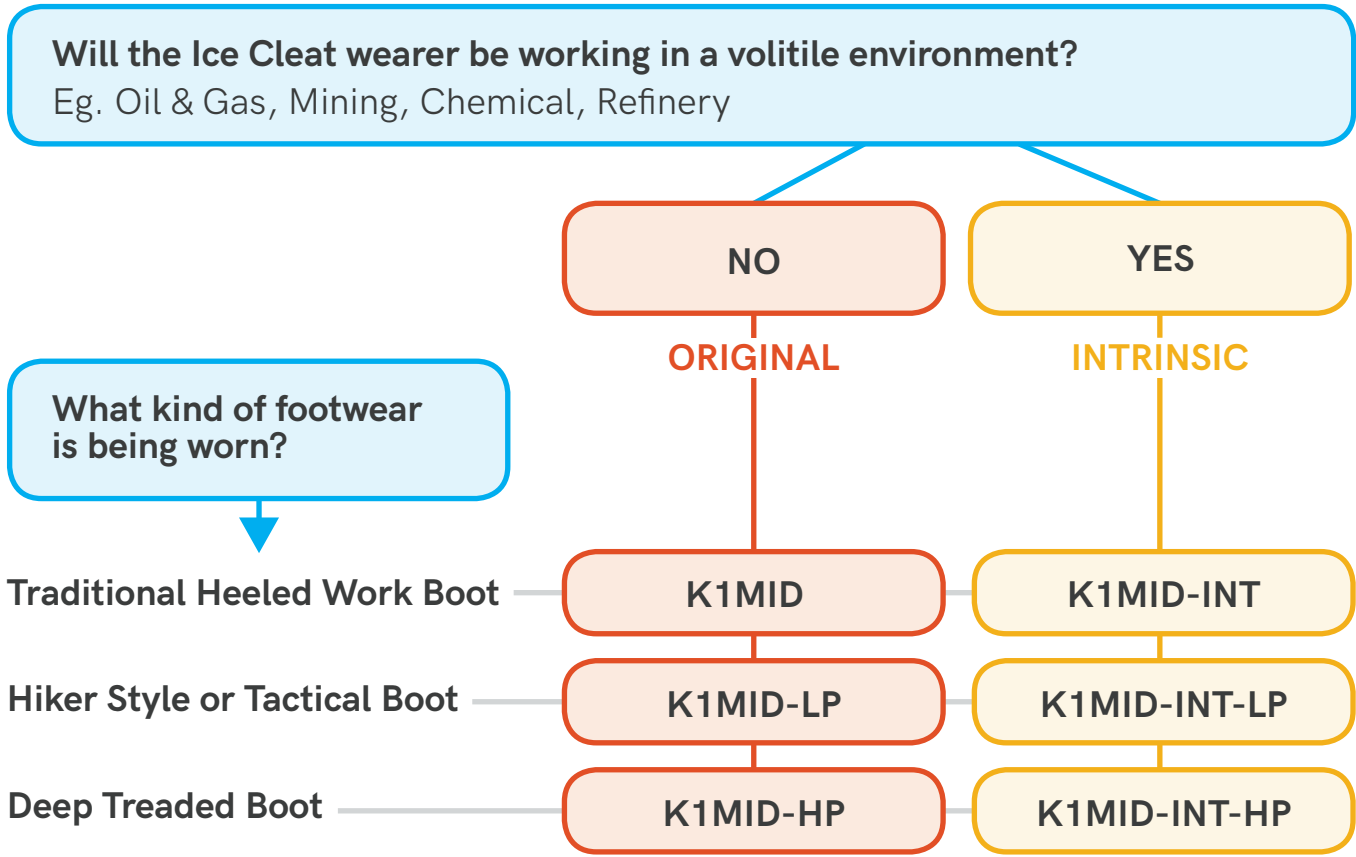

**K1-SPC** for Original or High Profile Models.

**K1-SPC-LP** for Low Profile Models.

# CHOOSING K1 MID-SOLES FOR YOUR EMPLOYEES

It's very easy to determine which model(s) is best suited for a company's employees with just a couple of questions:

ORIGINAL

LOW PROFILE

HIGH PROFILE

INTRINSIC

INTRINSIC LOW PROFILE

INTRINSIC HIGH PROFILE
